

Silver Seal™ Universal Remote Control

Models STV1 and STV5

According to Dr. William Rutala of the University of North Carolina, the entire environment within the healthcare setting harbors potential disease-causing bacteria that can be easily transmitted to others. The TV remotes often used in hospital rooms are included in that environment and are very hard to clean and disinfect.

The SEAL SHIELD™ waterproof universal remotes have been developed to help prevent the spread of infections, including MRSA and C. Diff. The SEAL SHIELD™ remotes are 100% waterproof and can even be disinfected with bleach. As an added safeguard, they include antimicrobial product protection. The combination of waterproof technology and antimicrobial product protection achieves the highest level of protection.

Meets medical industry standards to withstand harsh disinfectants.

 **100% WATERPROOF** + **ANTIMICROBIAL PRODUCT PROTECTION**

- 100% Waterproof Guaranteed
- Dishwasher Safe
- Silver Seal™ Antimicrobial Product Protection
- Device Code Search and Extensive Code Library
